

The graph displays the performance of eight models, categorized by 'best v' and 'best prop' for values 0, 1, 2, and 3. The x-axis represents a parameter ranging from 0.0 to 1.0, and the y-axis represents a performance metric ranging from 0.0 to 1.0. The 'best v' models (v 0, v 1, v 2, v 3) show a linear increase in performance as the parameter increases, with 'best v 3' achieving the highest performance at 1.0. The 'best prop' models (prop 0, prop 1, prop 2, prop 3) show a similar trend but with lower performance values, reaching approximately 0.95 at the parameter value of 1.0.
